

Marine Oil Filter

This marine oil filter is designed for filtering oil in marine engines and hydraulic systems. It protects critical components from contaminants and ensures optimal operational efficiency.

Product Overview

Robust Marine Filtration

This JIS-compliant marine oil filter is engineered for high-performance filtration in demanding maritime environments. Constructed from durable cast iron, it is designed to protect critical marine engine and hydraulic systems from contaminants. Its robust build ensures long-term operational efficiency and reliability for professional marine applications.

Material Specifications

Body Material	FC200 (Gray Cast Iron)
Bonnet Material	FC200 (Gray Cast Iron)
Cover Push Material	FCD400 (Ductile Cast Iron)
Strainer Material	SS400 (SUS304 Stainless Steel)
O-Ring Material	NBR (Nitrile Butadiene Rubber)

Compliance & Standards

Standards Compliance	JIS, Marine Grade
