

Marine Seawater Strainer

This seawater strainer is designed for marine sea and fresh water pipe systems on ships. It filters debris with a removable basket, ensuring optimal performance and protecting downstream equipment.

Product Overview

Marine Seawater Filtration Solutions

These heavy-duty marine seawater strainers and suction coarse strainers are engineered to maintain optimal fluid system integrity across all ship types. Built for resilience in aquatic environments, they effectively remove debris and solids from seawater and freshwater piping. The design incorporates flanged connections and a removable basket system to ensure ease of maintenance, protecting vital downstream equipment from damage.

Standards and Compliance

Compliance Standards

CBM1061-81, CB/T497-94

Technical Features

Compatible Systems

- Seawater pipes
- Freshwater pipes

Design Features

Flanged connections • Removable filter basket • Bolted maintenance cover • Heavy-duty housing
