Product Overview

JIS Marine Self-Closing Valve

This marine-grade self-closing valve is engineered for reliability in demanding maritime environments. Constructed from high-quality bronze, it provides exceptional corrosion resistance and durability. The integrated self-closing mechanism enhances safety by ensuring automatic shut-off, making it an ideal solution for critical fluid control systems.

Technical Specifications

Nominal Diameter	20 DN
Valve Type	JIS Marine Self-Closing Valve

Materials

Material Composition

Component	Material
Body	BC6
Bonnet	BC6
Disc	BC6
Stem	C3771BD or BE
Handle	SS400

Features

Key Features	Self-Closing Mechanism, Corrosion Resistant, Marine Grade, JIS Standard
