

Marine Thermal and Acoustic Insulation

Specialized insulation materials designed for marine applications, providing both thermal and acoustic benefits. Available in glass wool, rock wool, and ceramic fire plate options, these products come in various forms suitable for different marine vessel needs.

Overview

High-Performance Marine Insulation

This comprehensive range of marine thermal and acoustic insulation materials is engineered for demanding maritime environments. The product line includes high-quality glass wool, rock wool, and ceramic fire-rated plates designed for effective temperature control and sound dampening. Every component is built to meet rigorous safety standards, ensuring optimal protection for ship decks, bulkheads, and piping systems.

Material Types

Available Materials

- Glass wool (plate, pipe, felt)
- Rock wool (plate, pipe, felt)
- Ceramic fire plate (A60 rating)
- Ceramic fire pipe

Surface Finishes

Glass cloth covered, Aluminum cloth covered

Compliance and Standards

Class Certifications

ABS • BV • GL • LRS • NK • CCS

Accessories

Installation Accessories

Item Category	Description
Tapes	Glass cloth, aluminum/glass cloth, anti-splashing
Hardware	Washers, bottom washers, stud pins
