

Marine Turbocharger

Refurbished turbochargers that have been fully inspected and are in good working order. These units are ready to install, offering a cost-effective solution.

Product Overview

Professional Grade Marine Solutions

We maintain an extensive inventory of complete marine turbochargers and precision-engineered components. Our stock covers a wide range of industry-standard models suitable for various marine propulsion and auxiliary engine systems. Every unit is selected to meet rigorous performance requirements for professional maritime operations.

Operational Capabilities

Key Performance Metrics

650 °C

Maximum Operating Temp

57000 RPM

Maximum Rotational Speed

12 T

Maximum Weight

Inventory Summary

Inventory Listing

Component Category	Application Range
High-Efficiency Series	Marine Propulsion Systems
Turbine/Compressor Parts	Auxiliary Engines
Custom/Legacy Units	Broad Engine Compatibility

Stock Categories

Turbocharger Units, Turbine Rotors, Compressor Housings, Diffuser Rings, Nozzle Rings
