

Marine Winch for Ship Applications

This heavy-duty marine winch is designed for demanding shipboard applications such as anchor handling, towing, and mooring. It features a robust construction with a large cable drum and hydraulic drive system.

Product Overview

Robust Marine Performance

This heavy-duty marine winch is engineered for demanding shipboard operations, including anchor handling, towing, and mooring. Constructed with high-strength materials and a protective anti-corrosive coating, it is designed for longevity in harsh marine environments. The system features a powerful hydraulic drive and integrated safety protocols to ensure reliable performance on deck.

Technical Specifications

Drive System	Hydraulic
Number of Bolts	6

Safety & Compliance

Safety Features	Overload Protection, Emergency Stop
-----------------	-------------------------------------

Construction

Key Components

- Large capacity cable drum
- Hydraulic drive system
- Corrosion-resistant coating

Applications

Primary Applications

Anchor Handling • Towing • Mooring
