

# Masticating Centrifugal Juicer with Two-Speed Control

This juicer combines masticating and centrifugal extraction for efficient processing of whole fruits and vegetables. It operates at two speeds to minimize heat and oxidation, preserving nutrients and flavor.

## ADDITIONAL IMAGES

## Overview

### Efficient Juicing Performance

This high-performance juicer combines advanced extraction technologies to maximize juice yield while preserving essential nutrients and flavor. Designed with a durable stainless steel housing and a powerful motor, it efficiently handles whole fruits and vegetables using a large feeding chute. With dual speed settings and a pulse option, this machine offers a versatile solution for health-conscious environments, ensuring reliable and safe operation.

## Technical Specifications

### Power Requirements

**220 V**

Voltage

**50 Hz**

Frequency

**600 W**

Max Power

### Capacity Details

Component	Capacity
Pulp Container	1.5 L
Juice Cup	450 ml

## Design & Operation

### Construction Materials

- Stainless steel housing
- Stainless steel blade
- Stainless steel filter

Feed Tube Diameter	65 mm
Speed Settings	Speed 1, Speed 2, Pulse

## Safety & Compliance

### Safety Features

Built-in safety system • Anti-slip feet

### Continuous Operation Time

15 min
