

Masticating Slow Juicer for Fruits and Vegetables

This kitchen appliance is designed for extracting juice from fruits and vegetables. The vertical design features a feeding chute, auger, and separate containers for juice and pulp.

Overview

Masticating Slow Juicer

This masticating slow juicer is designed to maximize juice yield and nutrient retention from a variety of fruits and vegetables. Utilizing a vertical design, it efficiently processes produce through a specialized auger system to separate juice from pulp. Its compact form factor and durable plastic construction make it an ideal addition to any kitchen environment.
