

Masticating Slow Juicer for Fruits and Vegetables

This slow juicer efficiently extracts juice from fruits and vegetables. Its slow squeezing action helps retain nutrients and enzymes, resulting in a healthier and more flavorful juice.

Product Overview

Professional Masticating Slow Juicer

The HB-1302 Masticating Slow Juicer is engineered for maximum nutrient retention and high juice extraction efficiency. Operating at a gentle 75 RPM, the ceramic auger system ensures that fruits and vegetables are processed without heat buildup, preserving essential enzymes. This reliable appliance is designed for versatility, effectively handling everything from leafy greens to hard produce.
