

Material Converting Machine

This high-precision packaging machine is designed for efficient material processing. It converts films, foils, and laminates into desired widths and lengths using a robust frame and a user-friendly control panel.

Overview

High-Precision Material Converting

This high-precision packaging machine is engineered for efficient and accurate material processing. It features a robust frame construction and an intuitive control panel with a digital display for seamless operation. Designed for versatility, it excels at slitting and winding operations for various materials, including films, foils, and laminates.

Technical Specifications

Compatible Materials

- Films
- Foils
- Laminates

Construction

Robust Frame

Processing Capabilities

Slitting, Winding

Control Interface

User-friendly control panel with digital display
