

Material Crushing and Culling Machine

This machine is designed for crushing and culling various materials. It features a compact design with a user-friendly interface.

Product Overview

Precision Material Processing

This Material Crushing and Culling Machine is engineered for versatility and precision in both laboratory and industrial environments. Featuring a compact, space-saving design, it incorporates a user-friendly interface that allows for intuitive operation. The system utilizes digitally controlled temperature and time settings to ensure consistent, high-quality results across various material processing tasks.

Technical Features

Design & Versatility

- Compact design
- Interchangeable crushing plates
- Interchangeable culling plates
- Suitable for laboratory use
- Suitable for industrial applications

Key Indicators

GT • Biothermometer

Control System

Digital Temperature Control, Digital Timer, User-Friendly Interface
