

Material Cutting and Bending Machine

This cutting and bending machine is engineered for efficient material processing. Its robust construction ensures durability and precision in both cutting and bending tasks.

Overview

Versatile Material Processing

This material cutting and bending machine is engineered for high-efficiency metal processing tasks. Featuring robust construction, it provides the durability required for demanding shearing and forming operations. Equipped with a high-speed cutting blade and adjustable bending angles, this unit offers the precision and versatility needed for professional metal fabrication workflows.

Technical Specifications

Key Features

- High-speed cutting blade
- Adjustable bending angles
- Robust heavy-duty construction

Model Identifier	YG-90
Core Capabilities	Cutting, Bending, Folding, Metal Forming, Shearing
