

# Material Handling Plain Trolley

This plain trolley is designed for efficient material handling. It features durable construction and smooth-rolling wheels for reliable performance in various industrial applications.

## Product Overview

### Material Handling Plain Trolley

This plain trolley is engineered for efficient and reliable material handling in industrial environments. Constructed with a robust alloy steel body, it offers exceptional durability for heavy-duty lifting applications. Designed for versatility, the unit is compatible with various I-beam widths and features cast trolley wheels with caged bearings to ensure smooth and consistent movement.

## Technical Specifications

### Rated Capacity

**1 TON**

Capacity

Body Material	Alloy steel
I-Beam Compatibility	Adjustable for different widths
Wheel Type	Cast trolley wheel with caged bearing
Key Features	Strong, Robust, Smooth Rolling, Adjustable
