

Material Lifting Clamp

This heavy-duty lifting clamp is designed for securely hoisting and transporting materials. It features a robust construction with interlocking arms and curved jaws for a firm grip.

Overview

Heavy-Duty Material Lifting Clamp

This heavy-duty lifting clamp is engineered for the secure hoisting and transportation of materials in demanding environments. Featuring robust construction, it utilizes interlocking arms and curved jaws to ensure a firm, reliable grip during operation. Designed for versatility, it includes a top lifting eye for seamless attachment to cranes and hoists, making it an essential tool for construction, manufacturing, and industrial applications.

Key Features

Design Highlights

- Robust construction
- Interlocking arm mechanism
- Curved jaw design for enhanced grip
- Integrated top lifting eye

Applications

Suitable Industries

Construction, Manufacturing, Industrial

Safety & Compliance

Operational Type

Heavy-duty • Hoisting • Transport
