

Material Payoff Stand for Production Lines

This heavy-duty payoff stand facilitates continuous and reliable material feeding in production processes. Its robust steel construction ensures stability and long-term durability.

Product Overview

Industrial Material Payoff Stand

This robust material payoff stand is engineered for continuous and reliable material feeding in demanding industrial production environments. Constructed from heavy-duty steel, the unit provides exceptional stability and durability, featuring a vertically oriented structure with a motor-driven payout system. Designed for seamless integration, its modular build allows for customization within existing production lines, ensuring smooth and precise material handling.

Manufacturing Standards

Quality Certifications	ISO 9001:2000
Industry Experience	30 years
Product Range	8 series, over 50 products

Technical Features

Key Design Features

- Vertically oriented structure
- Integrated control panel
- Modular design for customization
- Floor-mount base for vibration reduction

Construction Material	Heavy-duty steel
Drive System	Motor-driven
