

Material Spreading Sprayer

This spraying machinery is designed for efficient and precise spreading of various materials. It is suitable for professional applications requiring consistent and uniform coverage.

Product Overview

Professional Material Spreading System

This high-performance spraying machinery is engineered for the precise and uniform application of various materials. Its robust construction ensures long-term durability and consistent operation even in demanding professional environments. Designed for versatility, this system is compatible with a wide range of coatings and liquids, making it an essential asset for specialized spreading tasks.

Technical Specifications

Model Variants

- W-71
- PLIFI
- PUFU
- WOFD
- JFD
- WUFE
- MUFU
- WPLIED
- UFO
- MPUR
- WUFU
- IPLIFT
- MUFO
- MUED
- UFU
- OFU
- FU
- MPUFU
