

Material Transport Wagon with Handle

This wagon is designed for transporting materials in apparel and textile machinery applications. It features a rectangular container with a handle for pulling, a green frame, and black wheels with orange hubs.

Product Overview

Industrial Material Transport Wagon

This durable material transport wagon is designed for efficient movement of goods within manufacturing, apparel, and textile production environments. Featuring a robust green frame and a high-capacity yellow container, it provides a stable platform for transporting components or raw materials. The integrated pull handle ensures easy maneuverability for operators navigating busy facility floors.
