

Matte Aluminum T8 Grid Lamp Panel

This T8 lamp panel features a wave shape design that produces soft, natural light and eliminates glare to improve light efficiency. Designed for offices, its wide beam angle allows for greater distance between luminaires, improving lighting uniformity and allowing flexible office layouts.

Overview

Professional T8 Grid Lighting Solution

The Matte Aluminum T8 Grid Lamp Panel is engineered for high-efficiency illumination in professional environments. Featuring a unique wave-shape design, it produces soft, natural light that effectively eliminates glare and enhances uniformity. This versatile panel allows for flexible office layouts, ensuring consistent lighting regardless of workstation positioning.
