Overview

Reliable Electrical Distribution

This surface-mounted distribution enclosure serves as a central hub for electrical circuits, providing a safe and organized housing for miniature circuit breakers. Designed for residential and commercial applications, it ensures secure power distribution with a capacity of up to 125A. The unit features a durable construction with a side-opening door for easy maintenance and inspection.

Technical Specifications

Model Number	DX18-M24TWB
Number of Ways	24
Rated Voltage	230/400V
Current Rating	125 A
Rated Frequency	50/60Hz
Incomer Type	MCB

Installation & Safety

Installation Type	Surface Mounted
IP Rating	IP30
Fire Resistance	650°C/30s

Design & Features

Door Opening	180° Sideward
