

MCB Pan Assembly for Electrical Panels

This plug-in MCB pan assembly is designed for electric power transmission and distribution systems. It facilitates the connection and protection of Miniature Circuit Breakers (MCBs) within electrical panels.

Product Overview

High-Performance MCB Pan Assembly

This MCB pan assembly is engineered for reliable electric power transmission and distribution systems. Designed to facilitate the secure connection and protection of plug-in type Miniature Circuit Breakers (MCBs), it offers a robust solution for industrial and commercial electrical panels. With its high-quality construction, this assembly ensures long-term performance and safe power distribution in demanding environments.

Technical Specifications

Max Incomer Current	250 A
Compatible Incomer Types	MCCB, MCB, ISOLATOR
Outgoing Branch Breaker	Plug-in type MCB
Model Number	ETB04

Market Suitability

Target Markets

Middle East • Africa • Latin America
