

Mechanical Clutch Assembly with Flange Mount

This mechanical clutch assembly is designed for transferring rotational power between components. It features a metallic housing with a square mounting flange, a central shaft, and various levers and linkages.

Product Overview

Mechanical Clutch Assembly

This mechanical clutch assembly is engineered for reliable power transmission in industrial machinery. Featuring a robust flange-mount design, it provides precise engagement and disengagement capabilities. Its compact configuration is optimized for applications requiring a 1:5.2 speed reduction ratio.

Technical Specifications

Speed Reduction Ratio	1:5.2
Wave Wheel Spline Size	9x9x12
Inner Gear Modulus	0.9

Performance Metrics

Suitable Load Capacity

4.5 KG

Suitable Clothes Weight

Design Features

Mounting Type

Flange Mount
