Product Overview

Reliable Fuel Delivery

This mechanical fuel pump is engineered to provide a consistent and reliable fuel supply from the tank to the engine's carburetor. Built with a robust cast metal body and a spring-loaded diaphragm mechanism, it ensures optimal pressure and flow for consistent engine operation. The unit is designed for durability, featuring corrosion-resistant materials and secure mounting points for long-lasting performance in automotive applications.

Technical Specifications

Included Components

- Fuel pump unit
- 2x Mounting gaskets

Body Material	Cast Metal
Mechanism	Spring-loaded diaphragm
Reference ID	150903

Compatibility & Use

Application Compatibility	Automotive Engines, Classic Cars, Vintage Car Restoration
