

Mechanically-Driven Sewing Machine

This sewing machine is designed for home or light industrial use. It features adjustable stitch settings, a rotary dial for selecting stitch patterns, and a standard needle and presser foot configuration.

Product Overview

Reliable Mechanical Sewing Performance

This mechanically-driven sewing machine is engineered for consistent performance in both home and light industrial environments. Featuring a robust belt-driven system, it offers users reliable operation and precise control. The intuitive rotary dial interface allows for easy selection of various stitch patterns, making it a versatile tool for diverse sewing projects.

Technical Specifications

Drive System	Mechanically-driven (belt system)
Stitch Control	Rotary dial pattern selection
Application	Home Use, Light Industrial
Model Identifier	JH-974
