

Medical Nebulizer for Respiratory Therapy

This device nebulizes liquid medicine, enabling inhalation into the bronchus and pulmonary alveoli. It features a compact, user-friendly design and an efficient, quiet, oil-free compressing pump.

Product Overview

Respiratory Therapy Solution

This medical nebulizer is designed to efficiently convert liquid medication into a fine aerosol mist, allowing for direct inhalation into the bronchus and pulmonary alveoli. The device features a compact, user-friendly design suitable for clinical or home-care settings. Equipped with an oil-free compressing pump, it ensures reliable performance while maintaining quiet and efficient operation for patient comfort.
