

Medical Protective Goggles

These protective goggles are designed for use by medical staff. They comply with standard GB14866-2006.

Product Overview

Medical Protective Goggles

These medical protective goggles are designed to provide essential eye defense against shocks, flying particles, and contagious liquids. Constructed with high-quality, non-allergic materials, they offer both anti-corrosion and oxidation resistance for long-term reliability. The ergonomic design ensures a wide field of vision, making them suitable for demanding medical, laboratory, and industrial environments.

Standards & Compliance

Compliance Standard

GB14866-2006

Protection Ratings

Shock Resistant, Liquid Splash Protection, Anti-Corrosion

Design & Comfort

Material Composition

- Non-allergic materials
