

Medical Upright Freezer for Pharmaceuticals and Supplies

This upright medical freezer is designed for storing temperature-sensitive medical supplies and pharmaceuticals. It features a forced-air cooling system, digital temperature display, and lockable door for secure storage.

Product Overview

Professional Medical Storage Solution

This upright medical freezer is engineered for the precise storage of pharmaceuticals and temperature-sensitive medical supplies. It features an advanced compressor cooling system with no-frost technology and an integrated internal fan to ensure uniform temperature distribution. With a secure, lockable two-layer glass door and internal LED illumination, it offers both security and excellent visibility for high-demand environments like pharmacies and laboratories.
