

Medium Duty Swivel Castor with Polypropylene Wheel

This medium duty swivel castor has a polypropylene wheel. It features a zinc-plated steel frame for corrosion resistance and reliable load distribution.

Product Overview

Versatile Medium Duty Solution

This medium-duty swivel castor is engineered for reliability in a wide range of industrial and commercial environments. Featuring a durable polypropylene wheel and a corrosion-resistant zinc-plated steel frame, it ensures long-lasting performance and smooth, quiet operation. The integrated swivel mechanism provides exceptional maneuverability, making it an ideal component for carts, equipment stands, and various mobile fixture applications.

Technical Specifications

Wheel Material	Polypropylene
Frame Material/Finish	Zinc-plated steel
Mobility Type	Swivel

Performance Features

Key Attributes	Corrosion Resistant, Quiet Operation, Medium Duty, Smooth Rolling
