

Medium Pressure Spray Gun

This medium pressure spray gun is engineered for versatile applications, providing a balance between transfer efficiency and atomization quality. Adjustable fluid, fan pattern, and air pressure controls allow for fine-tuning to accommodate various coatings and project requirements.

Overview

Professional Medium Pressure Spray Gun

The R-400 medium pressure spray gun is engineered for versatile applications, providing an optimal balance between transfer efficiency and atomization quality. Featuring a gravity-feed design with a durable, corrosion-resistant stainless steel nozzle and needle, it ensures consistent material flow and precise spray patterns. Its ergonomic handle and lightweight construction are designed to minimize user fatigue during extended professional use.

Technical Specifications

Adjustable Controls

- Fluid control
- Fan pattern control
- Air pressure control

Nozzle & Needle Material	Stainless Steel
Feed Type	Gravity-feed

Applications & Usage

Operational Requirements

Requires compressed air source

Suitable Applications	Automotive Refinishing, Woodworking, General Industrial
-----------------------	---
