

Medium Speed Three Thread Sewing Machine

This is a medium-speed three-thread sewing machine suitable for various stitching applications. It features adjustable stitch length, a differential feed mechanism, and an automatic lubrication system.

Overview

Industrial Sewing Excellence

The GN1-6 is a medium-speed three-thread sewing machine engineered for high-performance stitching across various garment manufacturing and textile processing applications. Designed for demanding industrial environments, its robust construction ensures long-term reliability and consistent output. Featuring an adjustable stitch length and a differential feed mechanism, this machine provides the versatility needed for diverse fabric types and thread requirements.

Technical Specifications

Stitch Type	Three-thread
Speed Category	Medium Speed

Features

Key Features

- Adjustable stitch length
- Differential feed mechanism
- Automatic lubrication system

Operational Benefits	Smooth operation, Minimal maintenance, High productivity, Versatile fabric compatibility
