Product Overview

High-Efficiency Melon Processing

This professional-grade melon cutting machine is engineered for high-volume commercial food processing environments. Constructed from thickened, brushed stainless steel, it offers exceptional durability and hygiene standards. The unit features a quiet, belt-driven mechanism powered by a national standard copper wire motor, ensuring stable and reliable long-term operation.

Construction & Design

Body Material	Thickened Stainless Steel
Surface Treatment	Brushed
Drive System	Belt Driving

Performance

Motor Type	National Standard Copper Wire Motor
Cutting Modes	Slicing, Shredding

Safety & Compliance

Safety Features

- Protective cover design
- Safety cage
- Emergency stop button

Operational Features

Ease of Use

Button-switched modes • Adjustable settings • Easy maintenance
