

Membrane Bioreactor System for Wastewater Purification

This system integrates membrane filtration with biological treatment to efficiently remove pollutants from wastewater. The membrane bioreactor system features automated controls and a compact design for reliable operation and production of high-quality effluent.

Product Overview

Advanced Wastewater Purification

This Membrane Bioreactor (MBR) system integrates advanced membrane filtration with biological treatment to efficiently remove pollutants from wastewater. Designed for reliability and cost-effectiveness, the system produces high-quality effluent suitable for various reuse applications. It features a compact footprint, robust construction, and automated controls to ensure seamless operation in demanding environments.

Certifications & Standards

Compliance & Certifications

ISO 9001, ISO 14000, NSF, NWRI, USEPA, CE

System Capabilities

Market Performance

400 units

Large/Medium Plants Served

60 %

Domestic Market Share

Max Project Capacity

2600000 tons/day

Service & Support

Global Service Network

Over 60 branches and subsidiaries worldwide providing technical support and after-sale service.
