

Membrane Switch Panels for Cookers

These membrane switch panels are designed for use in microwave ovens and induction cookers. They allow users to easily control the appliance's various functions.

Product Overview

High-Performance Membrane Switch Panels

These membrane switch panels are precision-engineered for integration into microwave ovens and induction cookers. Designed to withstand frequent use, they feature durable surfaces and reliable flexible ribbon cable connections for seamless control board interfacing. Available in a wide range of configurations, these panels provide a versatile solution for both new manufacturing assembly and appliance repair applications.

Technical Specifications

Performance Characteristics

Wear-resistant • Long-lasting • User-input optimized

Compatible Appliances

Microwave Oven, Induction Cooker

Connection Interface

Flexible ribbon cable
