

Memory Card Reader USB Data Cable

This USB data cable is designed for memory card readers. It facilitates data transfer between memory cards and computers using a USB Type-A connector and a proprietary connector.

Product Overview

Reliable Data Transfer

This USB data transfer cable is specifically engineered for seamless connectivity between memory card readers and computer systems. Featuring a durable design in a classic black finish, it ensures efficient data synchronization for your digital storage needs. The cable utilizes a standard USB Type-A interface for broad compatibility with most modern hardware.

Technical Specifications
