Product Overview

Professional Key Programming Solution

This specialized programming device is designed for automotive locksmiths and technicians working with older vehicle security systems. It allows for the programming of new keys, including scenarios where all original keys are lost or stolen. The system features a user-friendly software interface and supports multiple operating modes to ensure efficient key duplication and system diagnostics.

Vehicle Compatibility

Supported Models	A-klasa, E210, ML320, W140, W163, Gelenvagen
Production Years	1995 - 2000
Supported Immobilizer Systems	DAS BOX, AAM BOX

Technical Specifications

Supported MCU Types

- 0D53J
- 0D69J
- 0D62J
- 0G47V

Operating Modes

M1 (Secure) • M2 (Normal)

Supported Transponders	PCF7935, PCF7930
