

Metal Balance Beam with Adjustable Ends

This metal balance beam helps improve balance and coordination. It features adjustable ends and a sturdy build for effective training.

Product Overview

Metal Balance Beam for Toyota Corona

This metal balance beam is engineered for specific Toyota Corona models produced between 1964 and 1973. Designed for the upper right and left positions, this component features adjustable ends to ensure precise fitment and balance. It is a robust replacement part built to maintain vehicle stability and structural integrity.

Technical Details

555 Part Number	SK-2131
OEM Reference	04485-20030

Compatibility

Compatible Vehicle	Toyota Corona
Model Codes	RT4#, RT5#, RT8#, TR9#
Production Years	1964-1973

Installation

Position

Upper Right • Upper Left
