

Metal Blade Hand Scraper

This scraper features a robust metal blade securely fastened to a durable metal handle. Designed for scraping, smoothing, or spreading materials, this tool is ideal for construction, renovation, and various surface preparation tasks.

Product Overview

Professional Metal Blade Hand Scraper

This professional-grade hand scraper is engineered for heavy-duty surface preparation tasks. It features a robust metal blade securely riveted to a durable metal handle, ensuring long-term reliability in demanding environments. The integrated cylindrical grip provides improved control and user comfort, making it an ideal choice for construction, renovation, and material spreading applications.

Technical Specifications

Material Composition	Metal Blade, Metal Handle
Blade Attachment	Multi-riveted construction
Grip Type	Cylindrical ergonomic grip

Applications

Primary Applications

- Surface scraping
- Surface smoothing
- Material spreading
- Construction tasks
- Renovation projects
