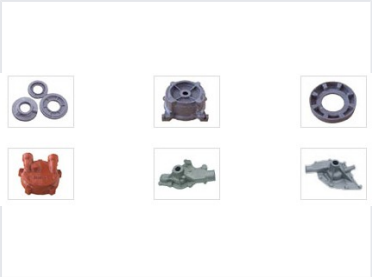
Metal Casting and Forging Components

Industrial metal components produced through casting and forging processes. Includes housings, flanges, and structural elements made from cast iron or forged steel.



Overview

Precision Metal Components

These high-quality metal casting and forging components are engineered for demanding industrial applications. The collection includes a diverse range of structural elements such as housings and flanges, designed to provide robust performance in machinery and equipment. Each part is crafted with attention to machining and surface finishing to ensure reliability and durability in professional settings.

Technical Specifications

Material Composition

Cast Iron • Forged Steel

Component Types

- Housings
- Flanges
- Structural Elements

Manufacturing Methods	Metal Casting, Forging, Machining
Primary Applications	Industrial machinery and equipment

Rooms 05–15, 13A/F South Tower, World Finance Centre, Harbour City, 17 Canton Rd, Tsim Sha Tsui, Kowloon, Hong Kong
