

Metal Casting and Forging Machine

This heavy-duty machine is designed for metal casting and forging. It features a robust cylindrical structure with a geared motor drive system and is mounted on a steel frame with wheels.

Overview

Industrial Metal Casting and Forging Solution

This heavy-duty metal forming machine is engineered for high-force casting and forging applications in demanding industrial environments. Built with a robust cylindrical structure and integrated internal vanes, the unit ensures consistent performance during metal shaping processes. It features a geared motor drive system and a large-diameter hose connection, all mounted on a durable steel frame equipped with wheels for enhanced portability and workspace flexibility.

Technical Specifications

Construction

Heavy-duty Steel • Industrial Grade

Machine Type

Casting, Forging, Metal Forming

Mobility

Yes

Components

Structural Design

- Cylindrical body
- Internal vanes
- Large-diameter hose connection
- Steel frame base

Drive System

Geared motor drive
