Product Overview

Robust Electrical Enclosure

This metal clad box is engineered to provide a secure and durable enclosure for electrical wiring and connections in professional installations. Constructed from high-quality metal, it offers excellent protection against physical impact and environmental stressors. The unit features versatile knockouts to facilitate efficient cable entry and exit, making it a reliable component for both single and double gang electrical systems.

Technical Specifications

Gang Configurations	Single Gang, Double Gang
Body Material	Durable Metal
Cable Entry	Integrated Knockouts

Key Features

Core Benefits

- Robust metal construction for long-term durability
- Versatile knockout design for multiple wiring configurations
- Secure enclosure for electrical grounding and component protection
- Compatible with professional electrical installation standards
