

Metal Coil Slitting Line

This industrial slitting line processes metal coils with a decoiler, slitter, and recoiler. It is designed for precision slitting of metal sheets into narrower widths, improving production efficiency and material utilization.

Product Overview

Industrial Metal Coil Slitting Line

This high-performance slitting line is designed for precision cutting and recoiling of metal coils, ensuring clean edges and tension control without surface scratching. Featuring an intuitive man-machine interface, the equipment delivers high-speed processing with exceptional dimensional accuracy. It is an ideal solution for steel mills, service centers, and large-scale manufacturing facilities requiring consistent material utilization.

Technical Specifications

Performance Highlights

20 ton

Max Coil Weight

200 m/min

Max Line Speed

Technical Data by Model

Model	Max Thickness (mm)	Max Width (mm)	Width Accuracy (mm)
1250	0.2-2.0	1250	±0.05
1600	0.3-3.0	1600	±0.1
1800	0.5-3.0	1800	±0.1
2000	0.5-3.0	2000	±0.15

Compatible Materials

Cold-rolled steel coil, Galvanized coil, Color-coated coil, Stainless steel coil
