

Metal Cold Chisel

This cold chisel is designed for cutting, shaping, and removing metal. Constructed from hardened steel, it features a wide, flat blade and an ergonomic handle.

Product Overview

Professional Grade Metal Cold Chisel

This robust cold chisel is engineered for demanding metalworking tasks, including cutting, shaping, and material removal. Constructed from hardened steel, it ensures durability and consistent performance in professional environments. The design incorporates an ergonomic handle to improve user comfort and control during extended operation.

Technical Specifications

Suitable For

- Professional Metalworkers
- Machinists
- DIY Enthusiasts

Material	Hardened Steel
Primary Applications	Cutting, Shaping, Material Removal

Features

Key Design Elements

Wide Flat Blade • Ergonomic Handle • High Durability
