

Metal Cut-Off Saw

This abrasive cut-off machine is designed for cutting metal profiles. It is suitable for cutting pipes, tubes, angle iron, and other metal profiles with precision.

Product Overview

Professional Metal Cut-Off Machine

The CF355A 355mm Cut-Off Machine is a robust tool designed for precision metal fabrication. Engineered for workshops and construction sites, it features a sturdy base and an adjustable workpiece clamp to ensure stability during operation. This machine is ideal for cutting various metal profiles, including pipes, tubes, and angle iron, using an abrasive disc for clean and efficient results.

Technical Specifications

Blade Diameter	355 mm
Model	CF355A
