

Metal Cut-Off Saw

This cut-off saw is engineered for precise and efficient cutting of metal materials. It features a quick-release vise, adjustable cutting angle, and an integrated coolant system.

Overview

Professional Metal Cutting Performance

The CS-275 is a robust cut-off saw engineered for precise and efficient cutting of metal materials in demanding environments. Designed with a sturdy frame and a powerful motor, it offers reliable operation for fabrication shops, construction sites, and metalworking facilities. Key features include an integrated coolant system for extended blade life and a quick-release vise for secure, versatile workpiece handling.
