

Metal Cutting and Bending Machine

This cutting and bending machine is designed for precision metal forming. It features a worktable with a grid pattern and a control panel for accurate control.

Overview

Precision Metal Forming Solution

This metal cutting and bending machine is engineered for high-precision metal forming applications. It features a robust frame designed for stability during operation, ensuring consistent results for various metalworking tasks. The integrated control panel with a digital display allows operators to manage cutting and bending processes with high accuracy.

Design & Construction

Frame Construction	Robust metal frame with black and orange finish
Worktable Features	Large surface area, Flat design, Grid alignment pattern
Leveling System	Yes

Control & Safety

Safety Features

- Warning labels
- Enclosed mechanical components

Control Interface	Side-mounted digital display and button control panel
