

Metal Cutting and Bending Machine

This cutting and bending machine is designed for industrial metalworking applications. It is equipped with a powerful electric motor and a large abrasive cutting wheel for efficient material removal.

Overview

Industrial Metalworking Solution

This heavy-duty machine is engineered for efficient metal cutting and fold-bending in demanding industrial environments. Built with a robust frame for durability, it features integrated wheels to ensure portability across the workshop floor. The system is powered by a high-performance electric motor and utilizes a large abrasive cutting wheel, making it an ideal choice for processing various metal profiles and sheets with precision and safety.

Key Features

Safety Features

Protective Wheel Guard

Capabilities

Metal Cutting, Fold-Bending, Industrial Grade, Portable Design

Technical Specifications

Construction

Heavy-duty reinforced frame

Mobility

Yes

Power Source

Electric Motor
