

Metal Cutting and Folding Machine

This machine is designed for precision cutting and folding of metal sheets. It features automated controls and a robust frame for efficient metalworking.

Overview

Precision Metal Forming Solution

This precision cutting and fold-bending machine is engineered for high-performance metal forming applications. Featuring a robust frame and advanced automated controls, it delivers exceptional accuracy and efficiency for both shearing and folding operations. It is a versatile tool designed to streamline metalworking projects and enhance production reliability.

Technical Specifications

Operational Capabilities

- Precision metal cutting
- Fold-bending operations
- Automated control system
- Robust frame construction

Performance Highlights

1 High

Accuracy Level

1 Yes

Automation

Application

Suitable Applications

Metal Forming, Shearing, Folding, Metalworking
