

Metal Cutting and Folding Machine

This heavy-duty machine is designed for precision metal forming. It features a robust frame, an advanced control panel, and multiple clamping mechanisms for secure material handling.

Overview

Precision Metal Forming Solution

This heavy-duty cutting and fold-bend machine is engineered for high-precision metal forming tasks. Built with a robust frame and advanced control systems, it ensures stability and accuracy during operation. Equipped with multiple clamping mechanisms, it provides secure material handling, making it an ideal choice for consistent and reliable metalworking applications.

Technical Specifications

Construction Features

- Heavy-duty robust frame
- Advanced control panel
- Multiple clamping mechanisms

Model Identifier	RG-100
Core Capabilities	Metal Cutting, Folding, Bending
