

Metal Cutting and Folding Machine

This high-performance machine is designed for cutting and folding metal. It is suitable for performing shearing operations in various industrial settings.

Product Overview

High-Performance Metal Processing

This high-performance cutting and fold-bend machine is engineered specifically for demanding metal forming applications. It offers robust shearing capabilities suitable for a wide range of industrial environments. Designed for efficiency and precision, this equipment streamlines complex metal fabrication tasks.

Technical Specifications

Available Models

- LGK-40
- LGK-63
- LGK-100
- LGK-200

Application

Industrial • Metal Forming

Primary Function

Metal Cutting, Metal Folding, Metal Bending, Shearing
