

Metal Cutting and Folding Machine

This cutting and folding machine is engineered for precise metal forming. It features a control panel with a digital display for user-friendly operation and ensures accuracy in metalworking applications.

Overview

Precision Metal Forming Solution

This industrial-grade metal cutting and folding machine is engineered for high-precision metal forming tasks. Featuring a robust, durable frame and an intuitive control panel with digital display, it ensures consistent results for demanding fabrication environments. The integrated large, flat work surface with a precision grid pattern facilitates accurate material placement and alignment for every operation.

Technical Specifications

Construction	Robust metal frame
Color Scheme	Orange, Black

Operational Features

Safety Compliance Safety Labels • Enclosed Components	
Interface	Side-mounted control panel with digital display
Work Surface	Large flat surface with integrated alignment grid
