

Metal Cutting and Folding Machine

This machine integrates cutting and folding functionalities for metal forming. It provides efficient and precise results for various metalworking tasks.

Overview

Versatile Metal Forming Solution

This metal cutting and fold-bending machine is engineered for high-efficiency metal forming applications. By integrating both cutting and bending functionalities into a single, robust unit, it streamlines production workflows and ensures high precision. Designed for shearing and bending sheets and profiles, it offers reliable performance for various metalworking tasks.

Technical Specifications

Build Quality

Robust Construction

Model Identifier

LJVW-60

Core Functions

Cutting, Bending, Shearing, Folding

Control System

Integrated control panel for simplified operation
